Government subsidized solar panels

WASHINGTON -- President Joe Biden is marking Earth Day by announcing \$7 billion in federal grants for residential solar projects serving 900,000-plus households in low- and middle-income communities.

My research focuses on direct economic benefits, such as government subsidies and tax breaks. By proposing \$350 billion in policy incentives, Biden is pushing solar further into the mainstream than ever before. Most of the costs and benefits of this massive solar play are distributed fairly, but I see room for improvement.

Typically, "free solar panels" programs refer to solar leases, PPAs or government programs for low-income households. Here we will discuss the third one: How to get free solar panels from the government in 2024. With certain Federal, State and Local government solar incentive programs available, it is possible to get low-cost solar panels from the government.
