What is Greenway solar?

Greenway is on its way to completing the largest community solar garden in Minnesota using Made in Minnesota panels. The energy produced by the 1 MW solar garden will provide both power and savings to over 200 families in our communities. Building a happy team is at the core of Greenway Solar's culture.

Is the Green Way Solar a good company?

The service received from The Green Way Solar was exceptional from start to finish. They setup a system to suit all our needs, their installation was neat professional and on point. Their follow up post installation was just as good. I can only recommend the team from The Green Way Solar to anyone looking to install solar.

Where is Greenway energy based?

Greenway Energy primarily serves sectors that require reliable power technologies, such as unmanned systems, backup power, and alternative fuel industries. It is based in Aiken, South Carolina.

Greenway Solar is a full service contractor for Midwesterners to switch to solar, providing farms, businesses, and homes with the opportunity to cut energy costs and support sustainable energy use. We spoke with founder Paul Krumrich to better understand their mission and journey in the renewable energy space.

With so many incentives and credits out there, it's no surprise that we're seeing more and more solar panels pop-up on rooftops as you take a stroll through your neighborhood or drive down the freeway. We're seeing huge solar arrays installed on farmland and small arrays added to the top of rvs and campervans. The US Energy Information Administration (EIA) reported a 34% ...

Cost Savings. Commercial solar provides a great return on investment. According to the U.S. Energy Information Administration (EIA), in 2021, the average commercial building spent \$650.04 on electricity (likely on par with most small-to-mid-sized-businesses). Over a year, this equates to \$7,800 in operating expenses.
