

As energy storage adoption surges across the UK and Europe, these projects underscore the critical role of batteries in supporting grid stability, enabling renewable integration, and building ...

In the face of volatile energy pricing and grid instability, energy solutions specialist Aggreko is highlighting the potential for battery energy storage systems (BESS) and battery hybrids to ...

To address these challenges, one promising solution is the integration of vehicle-to-grid (V2G) technology. By allowing EV batteries to act as distributed energy storage assets, V2G can help balance the grid, improve efficiency, and reduce ...

Battery storage in all its forms is a critical part of that journey, and we're pleased to be working with Envision Energy to deliver advanced solutions that will strengthen the grid and support ...

Funding: \$10.3M Powervault has developed the UK's most affordable and easiest to install home energy storage device, which can lower consumer electricity bills and provide emergency power to critical devices. ...

Around 10,000 UK homes have a storage battery Storage batteries help reduce your reliance on the grid The average price of a storage battery is £4,500 According to the latest official statistics, 10,000 households in the UK ...

Curious how to unlock the most from your energy? Explore expert energy storage solutions & product guides for homeowners, company owners, installers & investors. Learn about solar ...

The UK government has published a new "Solar Roadmap" policy paper setting out how it plans to achieve 45-47 GW of deployed solar capacity by 2030, from nearly 19 GW as of May 2025. ...

Battery storage systems were still under construction, and Spain had not yet scaled up grid-scale hydrogen or demand-response technologies. In essence, the grid was fragile in the face of ...

Envision Energy announced that it has executed two supply agreements to provide Lithium Iron Phosphate (LFP) containerised battery energy storage systems (BESS) for Field's Holmston ...

The Tesla Powerwall is a rechargeable lithium-ion battery that can be installed in your home to store harvested solar energy, energy from the national grid, or both. While Tesla is the market leader in solar/home storage ...

British renewable energy company RES has received consent from Rushcliffe Borough Council to build a 99.9MW battery energy storage system (BESS) near the defunct Ratcliffe-on-Soar ...

In the face of volatile energy pricing and grid instability, energy solutions specialist Aggreko is highlighting the potential for battery energy storage systems (BESS) and battery hybrids to help increase resilience and on-site efficiency. At ...

Solar Investors Guide: Storage systems to revolutionize the grid In Germany, the so-called exclusivity principle under the Renewable Energy Sources Act (EEG) has hindered the economic viability of solar and wind ...

Based in the North East, Byers Gill is RWE's largest consented co-located solar and battery storage project in the UK. The development project, once fully operational, would be capable of generating solar power equal to the needs of ...

By installing batteries at businesses and alongside legacy grid infrastructure, Allye Energy is building a network of distributed energy storage assets that solve local grid constraints, ...

You're not alone. As energy prices fluctuate and Grid demands evolve, landowners across the UK have turned to renewable energy battery storage as a smart and scalable solution. But just ...

With home battery storage, you can save hundreds on your energy bills each year and boost your property's value. In this blog, we'll explain how to unlock the full potential of your home with a battery, whether you already have ...

Scottish ministers have backed a major battery energy storage park near a town. The 29-hectare site, which was the focus of protest by campaigners, is the eleventh the developer has secured ...

In the face of volatile energy pricing and grid instability, Aggreko is highlighting the potential for battery energy storage systems (BESS) and battery hybrids to help increase resilience and on ...

As the UK accelerates toward a low-carbon future, the need for flexible, reliable, and intelligent energy infrastructure has never been greater. At Dale Power Solutions, our Battery Energy ...

Envision Energy recently announced that it has formally signed two equipment supply agreements with Field, a UK-based clean energy company. Under the agreements, Envision Energy will ...

Amit Gudka, CEO of Field, highlighted the projects as pivotal milestones. "Battery storage is crucial to achieving a cleaner and more secure energy system," he said, praising the ...
