

Harvest solar company

What is solar harvest?

Solar Harvest has been successfully concluded in March 2024. Solar Harvest has installed more than 700 10-kilowatt solar energy generation systems in 500 eligible schools and welfare non-Governmental organisations.

Why should you choose harvest solar?

At Harvest Solar, we specialize in designing and installing state-of-the-art solar solutions that not only reduce your carbon footprint but also save you money on your energy bills. Our team of experienced experts is committed to delivering top-quality solar panels and systems tailored to your specific needs.

How much electricity does solar harvest generate?

Solar Harvest has installed more than 700 10-kilowatt solar energy generation systems in 500 eligible schools and welfare non-Governmental organisations. It is expected to generate approximately 6.4 million kilowatt-hours of electricity per year, equivalent to the annual electricity consumption of approximately 1,950 three-person households.

What is a solar energy harvester system?

The proposed energy harvester system consists of a pavement solar box with a transparent polycarbonate sample and a thin-film solar panel. This device mechanism can store energy in a battery charged over daytime and later convert it into electric power as per demand.

What is solar energy harvesting technology?

Solar energy harvesting technology is well developed. Commercially available solar panels are proven electricity generators that make supplying the electrical grid financially viable. A variety of roadside solar panel installation examples exist in different countries.

Who is Sunvest solar?

Photo courtesy of Current Electric. SunVest Solar contracted Current Electric to build over 600 kW of solar on about 50 homes and 19 commercial sites for the Sokaogon Chippewa Community in Wisconsin. SunVest funded the project through a \$1.1 million grant from the U.S. Energy Department and the Department of Housing and Urban Development.
