

Has the payment been settled after the photovoltaic panels are installed

When will solar panels pay back to the grid?

New rules introduced this week will give homes and businesses that install solar panels payments for exporting electricity back to the grid from 1 January 2020.

Are solar PV installations sold between companies?

However, we are aware that in some instances solar PV installations are sold between companies, especially when companies go out of business. This change in ownership may not be communicated to the homeowner.

Can a third party install solar panels on a property?

The most common arrangement is that the third party installs solar PV panels on the property. The homeowner then receives the electricity generated (lowering their electricity bills) and the third party owner of the installation receives any associated subsidies, in this instance, FIT generation and export payments.

What happens if a solar PV company goes out of business?

Sometimes solar PV companies sell on installations, or the ownership changes if a company goes out of business. If you're unsure who owns the solar panels on your home, you can contact energy regulator Ofgem's Feed-In Tariff Register Team at fitregister@ofgem.gov.uk.

How do free solar panel schemes work?

'Free' solar panel schemes, also known as rent-a-roof schemes, used to be commonplace a few years ago. These were run by companies eager to cash in on the feed-in tariff (FIT). This guarantees payment in return for electricity generated using renewable technologies, including solar power.

Can a person own a solar PV installation?

While an individual can own the solar PV panels installed at their property, there are instances where the owner of an installation may be different from the owner of the property or site at which the installation is located.

That's essentially what it is: companies offer a lump sum to householders who already have solar PV installed, in exchange for receiving the remainder of their feed-in tariff. As with free solar panel schemes, these companies are keen to ...

As of November 2024, solar panel systems installed between April 2010 and July 2012 are currently receiving a rate of 5.07p for every kWh they send to the grid, while solar installations completed from August 2012 to April 2019 are getting ...
