

What is Weibo & how does it work?

Weibo was launched in August 2009 as the micro-blogging service of Sina.com, one of China's leading technology companies. It has since played an essential part in the public life of the Chinese people, reflecting China's socio-political transition in the post-Olympics decade.

Is Weibo a networked public?

Weibo as "networked publics"--both a public space and collectives (boyd,2010)--have amplified the visibility and social impact of public events,and enabled individuals to gather on this public "square" to participate.

Did Weibo polarize social media?

However,the split of "Chinese characteristics" and "universal values" did capture the polarization of networked publics with escalated contentions and the party-state's more aggressive taking over of social media. Weibo enhanced public visibility of both sides of the ideological contention("universal values" versus "Chinese characteristics").
