Please bear in mind that the calculator will provide estimates based on the information you have provided.

How much does a solar PV installation cost per kilowatt?

The mean average cost per kilowatt of a small solar PV installation (0-4kW) is above £2,000 for the first time since these records began in 2013/14. Prices for larger solar installations (4-10kW) increased even more dramatically - by 31% since 2021/22.

How much does it cost to install solar panels?

For the average 3.5kWp solar installation, business costs will come to approximately £2,450. The remaining 10-30% of the cost goes towards labour - the people who will actually fit your panels and the associated kit. This range should cover all domestic installations, including large jobs with more than 20 panels.

Why are solar panels so expensive?

Panel efficiency: The more sunlight a solar panel can convert into electricity per sq metre, the more expensive it will be. Panel number: More solar panels means more materials, which means a higher cost. You can limit the number of panels you need by choosing highly efficient ones (although they may cost more).

The cost range for a 350-watt solar panel in the United Kingdom is typically between £600 and £800. The most widely installed solar panel system is a 3.5-kilowatt peak (kWp) setup, which usually consists of 12 solar panels ...
