

# How often do solar panels need cleaning

Do solar panels need to be cleaned?

Check first with the manufacturer or installer of your solar panels for any specific recommendations on cleaning your panels. For example, bifacial solar panels may need cleaning on both sides. When cleaning, treat your solar panels like you would a pair of glasses. Debris is temporary and can be carefully removed, but a scratch is permanent.

How often should you clean solar panels?

You should clean your solar panels about every six months. Of course, the frequency of solar panel cleaning depends primarily on where you live. For example, if you live somewhere where it rains a lot, you may need to clean your panels less often than if you live somewhere dry and dusty where debris builds up more quickly.

How to clean solar panels effectively?

Now that you have everything you need, let's dive into the step-by-step guide for cleaning solar panels effectively. Timing is crucial when cleaning solar panels to ensure optimal results and safety. It's best to clean them early in the morning or late afternoon when the sun's rays are less intense, and the panels are cooler to the touch.

Should I hire a professional to clean my solar panels?

Just like washing your car or cleaning your home, you can hire a professional to clean your solar panels. If you have a rooftop system, it may be a good idea to call a professional cleaning service. In addition to the convenience of not climbing up on the roof yourself, professionals are properly equipped for rooftop safety.

Should you clean your solar panels during the summer?

Less than 0.05 percent efficiency is lost on average. For a homeowner, that adds up to saving about \$20 a year by cleaning their solar panels halfway through the summer. Essentially, under normal circumstances, you'll likely pay more to have your panels cleaned than you'll earn back in solar efficiency.

How much does solar panel cleaning reduce efficiency?
