

How often should you clean your solar panels

How do I clean my solar panels?

When cleaning, treat your solar panels like you would a pair of glasses. Debris is temporary and can be carefully removed, but a scratch is permanent. If you do clean your panels, here are some things to keep in mind: Use water only, unless you have hard-to-remove debris on your panels, such as bird droppings. Use a simple garden hose.

How often should solar panels be cleaned?

Solar companies recommend cleaning your solar panels at least twice a year, regardless of the weather conditions and where you live. That will lower the odds of there being too much dirt and debris collecting on your panels. The more time that passes, the more buildup -- and the harder it might be to clean.

Do solar panels need cleaning?

There are some instances where solar panels might need cleaning, but most of the evidence says solar panels are self-sufficient and low-maintenance. We'll get to the best way to clean your solar panels in a minute.

How much does solar panel cleaning cost?

Companies typically charge \$5 to \$15 per panel for solar panel cleaning services. Not cleaning your solar panels can lower your solar savings by \$79 per year, on average. You can clean solar panels yourself in a few simple steps or seek out a cleaning company that can do it for you.

Should I hire a solar panel cleaning service?

Again, the answer is probably not. If cleaning is advised, it will be less expensive to do it yourself rather than hire a solar panel cleaning service. On the other hand, if your garden hose isn't powerful enough to reach your rooftop panels from the ground and you don't want to climb onto the roof, hire a professional to do it for you.

Should you clean your solar panels during the summer?

Less than 0.05 percent efficiency is lost on average. For a homeowner, that adds up to saving about \$20 a year by cleaning their solar panels halfway through the summer. Essentially, under normal circumstances, you'll likely pay more to have your panels cleaned than you'll earn back in solar efficiency.
