

How to clean solar photovoltaic panels

How to clean solar panels effectively?

Now that you have everything you need, let's dive into the step-by-step guide for cleaning solar panels effectively. Timing is crucial when cleaning solar panels to ensure optimal results and safety. It's best to clean them early in the morning or late afternoon when the sun's rays are less intense, and the panels are cooler to the touch.

Do you need solar panel cleaning equipment?

But first, let's look at when and why you might need to invest in solar panel cleaning equipment or hire a professional cleaning service. Google did a study on the need to clean solar panels. They found that tilted panels don't require cleaning as much as flat panels.

Do solar PV panels need to be cleaned?

That said, most solar pv panels in the UK will not need any heavy-duty cleaning because regular rain will wash most dirt and grime off the surface, dispelling one of the myths about solar being its difficulty to clean.

Should you clean solar panels from the ground?

Safety first: Always prioritise safety when cleaning solar panels, especially if they are on rooftops. Most systems can be cleaned from the ground using a long-handled brush, reducing risk. If you can't reach the panels safely or are unsure about the process, hire a professional, as annual cleaning is typically sufficient.

Can you use vinegar to clean solar panels?

Vinegar is a great cleaning agent for solar panels because it contains acetic acid, which is very capable of breaking down tough stains, dirt and grease. It is also readily available and any vinegar will do although the best type to use is white cleaning vinegar.

When should I clean my solar panels?

Optimal timing: Clean your solar panels in the early morning or late afternoon when they are cooler. This prevents water from evaporating too quickly, which can leave streaks or residue and affect efficiency. Cooler panels are also safer to clean. Check warranty: Review your solar panel manufacturer's warranty guidelines before cleaning.

Clean solar panels let more sunlight into the photovoltaic (PV) cells that turn that light into electricity. If your panels are dirty, the sky might as well be dark all the time. A study into industrial solar panels published in ...
