

How to install photovoltaic panels with screw holes

How to install rigid solar panels on a roof?

EcoFlow's rigid solar panels come with a Tilt Mount Bracket for easy rooftop installation. The components include four fixing brackets, two adjustable brackets, and screws. This should be all you need to mount rigid solar panels on the roof or any other flat surface on your home that receives direct sunlight.

How to install a solar panel?

The first step is to attach the fixing bracket to the solar panel. Lay the solar panel face-down on the tarp or canvas to protect the photovoltaic surface. You want to be sure the mounting holes on the back of the panel align with the holes in the fixing bracket. Don't modify the module frame because doing so may void your manufacturer's warranty.

How do I Mount my solar panels?

Here's a step-by-step DIY guide to mounting your panels. Depending on various factors, your solar panel mounting process might differ slightly. For this guide, we use the Tilt Mount Bracket for EcoFlow 400W Rigid Solar Panel as an example. Make sure to consult your equipment manuals before proceeding to install your panels. 1. Plan and Prepare
