Should you install a DIY solar panel?

DIY solar panel installation is an accessible way to lower bills, reduce carbon footprint, generate renewable electricity and gain self-sufficiency with the reassurance of knowing you'll always have additional energy to rely on when the sun is shining, even when you're not connected to mains electricity.

How do I plan a solar panel installation?

Choose a supplier and establish if the installation will fall under Permitted Development or if full planning permission is required 3. Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.

How do solar panels convert sunlight into electricity?

This can be converted into electricity using solar photovoltaic panels, known as 'solar PV', installed on your roof. This electricity can power your home, save you money, and help to decarbonise grid supplied electricity. Solar PV systems - a collection of solar panels - turn sunlight into electricity through the 'solar cells' they contain.

What is solar power & how does it work?

The sun provides an abundant source of clean, renewable energy. This can be converted into electricity using solar photovoltaic panels, known as 'solar PV', installed on your roof. This electricity can power your home, save you money, and help to decarbonise grid supplied electricity.

How much does it cost to install solar panels?

For a 2,000 square foot home, expect solar installation to run from \$10,000 - \$20,000. Other factors affect pricing, such as the size of the system, demand, etc. Some installations may be less expensive. What are the dangers of installing solar panels?
