How do you maintain a lithium ion battery?

Storing batteries in cool, shaded areas and avoiding high charge levels can help maintain their performance. Regular maintenance checks, such as cleaning battery terminals, are also recommended. How does time affect the aging of lithium-ion batteries?

How do you store a lithium ion battery?

Unlike most other battery types (especially lead acid), lithium-ion batteries do not like being stored at high charge levels. Charging and then storing them above 80% hastens capacity loss. So charge the battery to 80% or a bit less if that will get you through the day/week.

How to maximize lithium-ion battery lifetime?

Here are some general guidelines from the U-M researchers to maximize lithium-ion battery lifetime, along with a few specific recommendations from manufacturers: Avoid temperature extremes, both high and low, when using or storing lithium-ion batteries.

What temperature should a lithium battery be kept away from?

Keep your battery or device away from temperatures above 25 °C (77 °F). When lithium batteries get hot, they naturally start to lose power and become less efficient. Do your best to keep your batteries away from heat sources, and never leave them in a hot area. This will prolong the battery life and keep your battery charged for longer.

Should you charge a lithium ion battery all the way up?

When your battery is discharging, Battery University recommends that you only let it reach 50 percent before topping it up again. While you're charging it back up, you should also avoid pushing a lithium-ion battery all the way to 100 percent. If you do fill your battery all the way up, don't leave the device plugged in.

What should you avoid when storing a lithium ion battery?

Avoid temperature extremes, both high and low, when using or storing lithium-ion batteries. Elevated temperatures can accelerate degradation of almost every battery component and can lead to significant safety risks, including fire or explosion. If a laptop or cellphone is noticeably hot while it's charging, unplug it.
