

How to remove the slider nut of the photovoltaic bracket

How do you attach a Solis inverter to a wall?

It is secured to its wall bracket by a PH3 screw at the bottom. Remove the inverter and bracket (caution: the inverter weighs 18kg, make sure you have a firm hold of it). Fasten the supplied Solis inverter bracket to the wall paying attention to where the inverter hangs on it.

How do you mount an inverter to a bracket?

6 Hang the inverter on the bracket: Align the two indentations in the inverter enclosure with the two triangular mounting tabs of the bracket, and lower the inverter until it rests on the bracket evenly. Secure the inverter to the bracket using the two supplied 5mm screws.

How do you mount an inverter on an uneven surface?

When mounting the inverter on an uneven surface, you may use spacers/washers behind the top mounting hole of the bracket. Depending on the angle, use the appropriate size and number of spacers so that the bracket is perpendicular to the ground.

How do I connect my solar panels to my inverter?

The solar panels are connected to the inverter using four MC4 connectors. These are the black plugs and sockets to the left on the underside of the inverter. Click the video to the right to show this process. Remove the connectors by pinching the prongs and withdrawing the plugs.

How do I turn off a power inverter?

1. Switch the inverter ON/OFF/P switch to OFF.
2. Enter SetApp and in the Commissioning screen, select Maintenance > Standby Mode > Enable.
3. Wait five minutes for the capacitors to discharge.
4. Switch the Safety Switch to OFF.
5. Disconnect the mains AC supply to the inverter by turning OFF the circuit breakers on the distribution panel.
- 6.
