

How to use the photovoltaic panel unpacking tool

How to unpack PV modules?

Unpacking of PV modules should always be done in the vertical manner by two persons as shown in the diagram. Also care should be taken for falling over one module to the other inside the packing box. Modules should be stored in a dry and ventilated environment to avoid direct sunlight and moisture.

How to pack solar PV modules?

Inside the box each module is placed in vertically. Put the module into the carton from one side with protector on four corners. Citizen Solar recommends that two people should load into and remove the modules from the pack carton for solar PV modules.

How to unload & store PV modules?

UNLOADING, UNPACKING & STORAGE At receipt of PV modules, verify the product details as it had been ordered. Packing list pasted outside the box contains all details including the serial no of modules. It is recommended to unload the packing box by using forklift only.

Can you walk on a LONGi Solar PV module?

DO NOT stand or walk on PV modules. Prior to beginning installation, review the Installation Manual for LONGi Solar PV Modules. Do not carry a module alone; always use two people to lift and carry. Do not drill holes in the frame of the module.

Can solar PV modules be installed in sunlight?

Use of insulated tools and gloves is recommended while working with modules in sunlight. No metallic contacts should be on the human body. The installation of solar PV modules should only be performed by a qualified licensed professional, including, without limitation, licensed contractors and licensed electricians.

Can PV modules be connected in parallel?

PV modules only with the same rating should be used in series and parallel connections. Connect modules in parallel to increase current. Connect wires from the positive terminal of the one module to the positive terminal of the next module. Do not connect modules in parallel without using a connection box.

unpacking. ? Before cutting off the inner packing belt, please take protective measures to prevent the modules from toppling. Take precautions to avoid scratches on the face or eyes. ? Use ...

The voltage of a solar panel is not fixed. As the temperature of a panel increases, its voltage decreases, and as its temperature decreases, its voltage increases. The rate at which the ...

By Chengjiang Fu, head of product and solutions, LONGi Solar North America One of the biggest trends in

How to use the photovoltaic panel unpacking tool

solar modules is the arrival of large-format modules. The benefits of these mega modules have been widely ...
