\$50M for the Florida Energy Systems Consortium (FESC) \$250,000 for DEP to conduct rule-making for cap and trade program. Governor Crist committed to partnering with Germany and the United Kingdom to discuss and promote initiatives that broaden the Kyoto Protocol and reduce the emission of greenhouse gases beyond 2012.

Microstructure Effects on the Capacity, Power, and Energy Density of Metal-air Batteries for Large Grid Storage Applications- Petru Andrei: 5. Environmentally and economically sustainable production of fuels and chemicals from sweet sorghum- Wilfred Vermerris: 18. Nanomaterials for Enhancing Electrochemical Energy Storage- Wolfgang Sigmund: 6.

Educational materials and programs developed by FESC are based on energy and climate research findings and analysis conducted at Florida's state universities as well as national sources. Outreach programs are designed to deliver practical, applicable information and knowledge to targeted groups including: the general public, professionals ...

As part of our outreach effort, directed by UF's Dr. Pierce Jones, FESC is continually expanding Energy Fact Sheet development. The following publications are available online through the Energy Education Library, located on the Florida Department of Agriculture and Consumer Services website. New fact sheet categories/fact sheets are added as they are developed.

FESC has an Industrial Partnership and Innovation Strategy that assures active collaboration with the private sector and other partners that will support and guide FESC's vision, collaborate with FESC in our research, education, innovation, and outreach programs, and provide our students with an unparalleled educational experience to prepare them as R& D and innovation leaders ...

External Collaborators: Solid-State Energy Technology, Inc., Lynntech, Inc., Planar Energy Devices, Inc., CFX Battery, Inc. This project has been completed. November 2011 Annual Report May 2010 Progress Report November 2011 Annual Report May 2011 Progress Report: top _____ Title:PV Power Generation Using Plug-in Hybrid Vehicles as Energy Storage

FESC's leadership team and organizational structure assure that truly leading edge research and development of critical importance to the Florida and national economies are developed, world-class students in multiple disciplines of energy are trained, and industry reaps the full benefits of the Consortium's activities. The Leadership Team ...

UF Energy Expertise. The University of Florida (UF) has strong programs in basic and applied clean energy

[Http floridaenergy ufl edu fesc-expertise batteries-and-energy-storage](http://floridaenergy.ufl.edu/fesc-expertise/batteries-and-energy-storage)

research. Over 100 faculty members are engaged in research ranging from energy efficiency, power generation, distribution, security to nuclear energy.

FESC - Policy Related Centers . Center for Governmental Responsibility ... and service that addresses the interface of energy, ecology and economics. Through its communications and outreach program, the CEP provides a forum for exchange of information and increased understanding of the major environmental issues of our time.

The building will incorporate a carefully chosen package of the latest energy - efficiency technologies and renewable energy systems to achieve the most successful and reliable results. The building will utilize Photovoltaic solar electricity and solar domestic hot water heating systems using the grid as an energy storage system, producing ...

Algae - Pros and Cons . PROs . Absorbs carbon dioxide as it grows . Both waste CO₂ and wastewater can be used as nutrients . Higher energy per-acre than other bio- fuels . Can be grown on land unsuitable for other types of agriculture

In today's diverse energy landscape, next-generation energy conversion and storage technologies are key to ensuring that end users have access to reliable, efficient, resilient and green energy ...

Energy Future Bringing Energy Solutions to Serve Florida, the Nation, and the World Dr. David Norton Interim Director Ms. Canan Balaban Associate Director Email: cbalaban@ufl University of Florida Nuclear Science Building 202 A PO Box 116560 Gainesville, FL 32611-6560 (352) 392-0947 FESC LEADERSHIP FESC Office

The Transportation, Energy and Space Technology Hub (TEST Hub) project uses the Kennedy Space Center facilities, workforce and that installation as a place to conduct energy technology development, demonstration, test and evaluation. Energy Florida has been working for several years to open up the resources of

Martinez, ...

The Florida Energy Systems Consortium (FESC) was created by the Florida State government to promote collaboration among the energy experts at its 11 supported universities to share energy-related expertise.

Strategic Thrusts. Developing Florida's Biomass Advantage for Renewable Fuels. Harnessing Florida's Solar Resources. Enhancing Energy Efficiency and Conservation. Securing Energy Delivery Infrastructure and Energy Storage. Capturing Florida's Marine Energy Resources for Power Generation.

Http floridaenergy ufl edu fesc-expertise batteries-and-energy-storage

The Florida Energy Systems Consortium (FESC) was created by the Florida State government to promote collaboration among the energy experts at its 12 supported universities to share energy-related expertise. The consortium assists the state in the development and implementation of an environmentally compatible, sustainable, and efficient energy ...

forth by the Florida Energy Systems Consortium (FESC). Primarily, the effort will address Task 11 of FESC. Collaborative efforts are currently being planned with other FESC members. At this stage, smartgrid, smart metering, energy storage, demand response and ...

The Consortium has very strong and diverse energy expertise. More than 400 faculty members are currently engaged in energy related research. The energy expertise within the consortium includes energy efficiency, biomass, solar, marine, grid, storage, carbon capture, nuclear, policy/economics, and energy education/outreach.

Dr. Kevin Jones at the University of Florida is one of the recipients of FESC Technology Commercialization Phase II funding. He is collaborating with Planar Energy under this program. The article below describes the Planar Energy technology. By Scott Faris, Planar Energy (Ref: American Ceramic Society Bulletin, Vol. 91, No. 2)

FESC Bringing Energy Solutions to Florida, the Nation and the World. The Florida Energy Systems Consortium (FESC) was created by the Florida State government to promote collaboration among the energy experts at its 12 supported universities to ...

multi-functionality through diverse Center expertise: materials, length scales, I/O energies, devices, transduction, and power sources o Expertise: 27 faculty in 6 departments/colleges (ECE, MAE, MSE, BME, CHE, Photonics) at the University ...

NAM activity highlights 9 Saft Energy Storage Overview, June 2014 Confidential FERC orders 755 and 784 Recognizing speed and accuracy of storage California AB2514 - CPUC Rulemaking R.10-12-007 1.325 GW of storage purchases by IOUs by 2020 So Cal Edison RFO for 50 MW to 650 MW of storage for resource adequacy
