

I regret installing photovoltaic panels in a farmhouse

Why do homeowners regret installing solar panels?

Low-quality or poor-standard panels may cause more problems than they solve. Solar panel manufacturers often promise high output levels for their products. However, if these promises aren't met due to inferior materials or manufacturing processes, it's easy to see why homeowners regret installing solar.

Can solar panels be installed on a house?

Solar photovoltaic (PV) panels can be installed on a wide range of homes. We've heard from people installing solar panels on bungalows and terraces, as well as semi-detached and detached houses. If your main house roof is unsuitable (a thatched roof, for example), solar panels can instead be installed on a garage or other outbuilding.

Should you install solar panels again if you move home?

Imagining your house filled with mess from a lengthy installation could be enough to put you off considering solar panels. But few owners complained to us about the installation being disruptive, and 80% said that they'd install solar panels again if they moved home.

How to claim VAT on solar PV installation?

The claim is made through the Revenue Commissioners VAT 58 form. Alongside this VAT, farmers can write the entire cost of their solar PV installation off against tax in year one under the accelerated capital allowance (ACA) scheme. Solar pv siting The angle and orientation of the solar array is very important.

Can solar panels be installed on a roof?

Your installers will usually need to erect scaffolding to install solar panels on your roof. Once this is up, solar panels can be installed in a day or two. The inverter will usually be fitted in either a loft or garage. This converts the DC your panels produce to AC that you can use in your home.

How do I choose a solar panel?

Find out more about types of solar panels and other buying advice for solar panels. To help decide which type of solar cells to go for, look at cost per watt (£/W) of power output. You can do this by dividing the total cost of the solar system you are being quoted for by the total power output of the system.
