Can solar panels be installed in a conservation area?

To increase the chances of your solar panel installation being approved in a conservation area, you can make a few upfront choices, such as: Selecting solar panel styles that blend in with your roof or building's design, such as solar tiles. Black solar panels tend to look much more appealing than blue

How many solar panels are installed in the UK?

There have been 371,000 solar panel installations since January 2022, which has grown the proportion of UK households with solar panels from 3.5% to 5%. Considering just 183,050 solar panel systems were installed from the start of 2016 to the end of 2021, this represents a massive uplift. How does UK solar uptake compare to other countries?

What regulations apply when installing solar panels?

The following regulations apply when installing solar panels on listed buildings, in World Heritage Sites, or conservation areas: If you live in a conservation area and want to install solar panels, contact your local council who will decide if the changes you want to make will maintain the aesthetic of your area.

Where are the best places to buy solar panels?

The areas of the UK with the highest solar adoption rates are broadly also the best places for solar panels - and that's no coincidence. On average, households in Wales and the south of England can save more money with solar panels than other regions of the country, which makes the prospect more attractive.

Can a solar panel be installed on a road?

There are a large number of formally approved solar panel installations in conservation areas, including on roofs that face the road. What you need to do is speak to your local council and let them know about your decision to install. Unless there is a valid reason to state otherwise, permission for the installation should be granted.
