

Insurance companies and solar panels

Does homeowners insurance cover solar panels?

Here's a look at the coverage homeowners insurance offers for solar panels. A standard homeowners insurance policy covers roof-mounted solar panels under the policy's dwelling coverage. If the solar panels are on the ground or on the roof of a shed or detached garage, they'd be covered under the policy's other structures coverage.

Do solar panels raise homeowners insurance premiums?

Solar panels can lead to excellent savings on energy bills, but they could raise homeowners insurance premiums. Here's why.

Should I tell my insurance company if I have solar panels?

Whether you buy or lease your panels, you should always tell your insurance company that you've installed solar panels on your home. Note that if you lease your panels and insure them yourself, your insurance company may limit any claim payout for wind and hail damage since you don't own the panels.

Should you add solar panels to your home insurance?

They may also want to increase their homeowners policy limit. Adding solar panels increases the value of the home as well as the cost to rebuild if the house is destroyed by a fire or storm. If homeowners don't want to be responsible for paying the difference on their own, they should talk to their insurer about adding additional coverage.

Do I need insurance if I don't own solar panels?

If your insurer doesn't provide coverage or provides limited coverage for solar panels, then you may need a separate policy. As with homeowners insurance, some solar panel insurers may not cover wind or hail damage. Do I need insurance coverage if I don't own the solar panels?

Do I need insurance if I lease solar panels?

Individuals who lease their solar panels may not need to purchase additional coverage for their solar panels because some leasing companies carry their own insurance for the solar panels. It's best for homeowners to check with the company they're working with before they make any changes to their policy.
