What is the global solar PV inverter market value?

The global solar PV inverter market reached a value of almost USD 8.45 billion in the year 2023. The market is further expected to grow at a CAGR of 5% between 2024 and 2032 and to reach a value of almost USD 13.13 billion by 2032. As per industry reports, the total global solar power capacity reached 1 terawatt (TW) in April 2022.

Why is the PV inverter market growing?

Increased global PV demand: The increased global demand for photovoltaic (PV) systems presents a massive opportunity for the PV inverter market to grow substantially in the coming years.

How big is the PV inverter market?

The PV inverter market size is valued at US\$15.28 billion by 2024, from US\$41.87 billion in 2021, at a CAGR of 15.5% during the forecast period.

How will the North America solar PV inverter market grow?

North America solar PV inverter market is also expected to grow at a fast pace during the forecast period as the United States is a significant market for various types of PV inverters. The region's growth is further driven by favourable government incentives, increasing awareness of clean energy, and declining solar panel costs.

Which region has the largest solar PV inverter market share?

Asia Pacific is expected to account for the largest solar PV inverter market share, driven by the growing demand for renewable energy and the need for energy independence. The region is home to many developing countries, including China and India, where there is considerable growth in solar photovoltaic (PV) installations.
