

Is it good to install solar power generation at home

Should you install solar panels at home?

Having solar panels installed at home sounds like an appealing idea. You get free electricity when the sun shines, potentially cutting your energy bills and doing your bit for the environment without having to give it much additional thought.

Why should you install solar panels?

Installing solar panels lets you use free, renewable, low carbon electricity. You can sell surplus electricity to the grid or store it for later use. According to low-carbon certification organisation MCS, there were more than 183,000 solar panel installations across the UK in 2023.

Do solar panels work if you are not at home?

If you are not at home most days then the solar PV generation will only power the fridge and any other electrical appliances that happen to be running during the daylight hours. The best way to optimise the return on investment from your solar panels is to use all the generation.

Can solar panels save money on electricity bill?

The amount of money that you will save on your electricity bill by installing solar PV panels will depend on how much of the generation you actually use. If you are not at home most days then the solar PV generation will only power the fridge and any other electrical appliances that happen to be running during the daylight hours.

Can you build your own solar panels?

To get straight to the point, yes, you can build your own solar panels, or at least partially, depending on the craftsmanship of each person. The process DIY includes sizing the solar panel system, choosing which components suits your needs, mounting and installing the solar panels, the solar inverter and safety disconnects.

Do solar panels generate more electricity?

The size of the solar installation is a big factor affecting electricity generation. Although it will cost more upfront to install more panels, a larger solar panel system will always generate more electricity. However, if you generate more than you can use during the day, you'll need a storage battery to make the most of it.
