Is it a good time to install solar panels?

Hopefully you feel more confident about the process of installing solar panels. With 69% of people telling our National Home Energy Survey that they're likely to buy or rent a home with solar panels, now is a great time to go solar.

Should you buy or rent a home with solar panels?

With 69% of people telling our National Home Energy Survey that they're likely to buy or rent a home with solar panels, now is a great time to go solar. And if you're ready to get solar panels on your roof, it's never been simpler to compare prices with our easy-to-navigate tool.

How do I choose the best solar panel installation?

Address any necessary repairs or replacements before proceeding with the installation to prevent future issues. Factors like shading, roof angle, and direction also play a significant role in determining the best solar panel installation for your home. That's why we recommend installing solar panels after a thorough assessment of these factors.

Do solar panels need to be wired before installation?

Without fastening them at first, the installers will place the solar panels onto the mounting system. Once the correct angle is achieved, the panels are fastened with bolts. Your solar panel will most likely be pre-wired before installation, meaning that the wiring process can be skipped.

Do solar panels need a battery?

Some people also decide to pair their solar panels with a solar battery, which will store excess solar energy to be used on cloudy days or during the night time. If you have a solar battery in your system, the battery also needs to be connected to the inverter at this point. Find out more about how solar batteries are installed on our page.
