Are wall-mounted solar panels more difficult to install?

Depending on how high the walls of your house are, wall-mounted panels can also be more challenging to install. Unlike your roof, your solar panel installers won't be able to walk around and may have to complete the job with a ladder or harness. This means wall-mounted solar panel installation can cost more than roof-mounting.

Can solar panels be mounted on a wall?

So, although it is possible to mount solar panels on a wall, it's not ideal. You're also less likely to be able to mount as many solar panels on a wall as you would on a roof, which means they won't generate as much electricity as a roof-mounted system. What are the pros and cons of wall-mounted solar panels?

Can solar panels be installed on a roof?

Home solar energy system owners have traditionally focused on installing panels on rooftops. However, wall mounting offers an alternative for properties with unsuitable roofs due to structural issues or shading. This guide explores regulations, considerations, and the practicalities of wall-mounted solar panels.

Are vertical solar panels hard to install?

Vertical solar panel installation requires unique gear due to the naturally steep slopes of the walls they are mounted on. Additionally, due to the steepness of walls, wall-mounted panels are much harder to install than traditional roof solar panels.

Are wall-mounted solar panels a viable alternative to a roof?

Wall-mounted solar panels offer a viable alternative for UK properties with unsuitable roofs. While specific considerations regarding installation, regulations, and efficiency exist, they present an innovative way to harness solar energy, especially during winter.

How do I choose a wall-mounted solar panel?

When considering wall-mounted solar panels, it's essential to evaluate several factors to ensure your home is suitable for such an installation. Start by examining the solar potential of the walls on your property. A south-facing wall is preferable in the Northern Hemisphere as it receives the most sunlight throughout the day.
