This wiki lowkey sucks I mean why y'all made a ripoff of the solar system wiki but with ugly object show assets only for someone to make fun of someone for being stupid and get hacked. ?

Johannes Kepler, 1571-1630, was a German astronomer, mathematician, and scientist. He is best known for his laws of planetary motion, which describe the orbits of planets around the Sun. He also made significant contributions to the fields of optics and acoustics.

Maxwell's equations are a set of four partial differential equations that describe the behavior of electric and magnetic fields. They are named after James Clerk Maxwell, who formulated them in the mid-19th century. The equations are: Gauss's law, Gauss's law for magnetism, Faraday's law of induction, and Ampere's law with Maxwell's correction.

CUDA is a parallel computing architecture and programming model developed by NVIDIA. It is used for general-purpose computing on graphics processing units (GPUs). CUDA allows developers to write programs that can execute on the GPU, which is much faster than the CPU for many types of calculations.

Kepler-452B is an exoplanet located in the Kepler-90 system, which is a multi-planet system orbiting the star Kepler-90. Kepler-452B is a rocky planet with a radius similar to Earth and a distance from its star that is similar to the distance between Earth and the Sun.

Kepler-22b is an exoplanet located in the Kepler-22 system, which is a multi-planet system orbiting the star Kepler-22. Kepler-22b is a rocky planet with a radius similar to Earth and a distance from its star that is similar to the distance between Earth and the Sun.

Kepler's laws of planetary motion, in astronomy and classical physics, laws describing the motion of planets in the solar system. They were derived by the German astronomer Johannes Kepler, who announced his first ...

Johannes Kepler, German astronomer who discovered three major laws of planetary motion. His discoveries turned Nicolaus Copernicus's Sun-centered system into a dynamic universe, with the Sun actively pushing the ...
