

Ukraine is facing unprecedented energy challenges. In recent years, widespread power outages caused by infrastructure damage, fuel shortages, and grid instability have disrupted daily life and essential services. Rural areas, in ...

Ukraine is redesigning its grid into a hub-and-spoke network of smaller renewable and CHP plants--less vulnerable to missile strikes, more attractive to insurers and lenders. Wind load ...

Spain boasts industrial strength and access to cheap solar energy, yet new investment is slowing. José Donoso, CEO of solar association UNEF, outlines the challenges and potential solutions ...

The conflict in Ukraine has acted as a catalyst, pushing many countries to fast-track green energy projects and reduce exposure to geopolitical risks. Innovations in battery storage, smart grids, ...

- Ukraine's war reshapes global geopolitics, driving defense modernization, energy transition, and commodity shifts since 2022. - NATO's 5% GDP defense spending pledge and European LNG diversification create long-term ...

The world's current trend toward energy instability shares some parallels with the 1970s oil crisis, which prompted an upsurge of United States and European solar research laboratories to ...

By technology, pumped-storage hydroelectricity accounted for 84% of 2024 revenue; battery systems are forecast to expand at a 16.5% CAGR between 2025-2030. By connectivity, on-grid systems commanded 90% share ...

The forecast period (2025-2033) is expected to witness continued growth, fueled by ongoing investments in LNG infrastructure, technological innovations in cryogenic storage technology ...

The renewable energy investment market is experiencing robust growth, driven by increasing global concerns about climate change, supportive government policies promoting clean energy adoption, and declining costs of renewable ...

Energy storage technologies are being prioritised in order to improve system resilience and facilitate Italy's energy transition objectives, ranging from lithium-ion batteries to hybrid solar ...

The Ukraine-Azerbaijan Transbalkan Gas Deal, proposed in 2025, represents a pivotal shift in Europe's energy architecture. As the continent scrambles to replace Russian gas after the ...
