

Legal Cases for Solar Power Generation

Who is responsible for a solar project in the UK?

Solar energy is expected to more than double by 2030 and will therefore continue to be a key part of the UK's decarbonisation strategy. The main parties to solar projects will often include the: Developer (employer) - who obtains planning consent and finance for the project. Contractor- who is responsible for building the solar plant.

Can solar power help decarbonise the UK energy sector?

Co-written by Matthew Fox and Toby Yeates of Pinsent Masons. The central role envisaged for solar power generation in supporting the decarbonisation of the UK energy sector is reflected in a draft revised planning policy designed to shape decision making on major renewable energy projects.

Who is involved in a solar project?

The main parties to solar projects will often include the: Developer(employer) - who obtains planning consent and finance for the project. Contractor - who is responsible for building the solar plant. Suppliers/manufacturers - who supply key plant and equipment used in the project,including panels,inverters and transformers.

Should solar farms have public rights of way?

Whilst the additional policy provided in relation to public rights of way acknowledges the potential impacts that large-scale solar development may have on such routes,it is often the case that landowners will agree to permissive paths being created for the operation of the solar farm but not the adoption of public rights of way.

Should solar farms be considered temporary?

The draft revised EN-3 retains the helpful steer given in the initial 2021 proposed reforms that impacts from solar farms should be considered as temporary,though it does recognise that project developers will take different approaches to determining how the project lifetime should be considered in the consenting process.

How much solar energy will the UK have in 2021?

In 2021,the UK added 730MWto its solar capacity,taking the UK's overall capacity to 14.6GW. Solar energy is expected to more than double by 2030 and will therefore continue to be a key part of the UK's decarbonisation strategy. The main parties to solar projects will often include the:
