

Lithium battery training courses

What is a lithium batteries course?

This lithium batteries course is intended as initial or recurrent training for participants involved with the handling, shipping, and/or transport of Lithium Batteries by air .

What is lithium batteries awareness training?

The Lithium Batteries Awareness Training course provides an overview of the hazards associated with lithium ion and lithium metal cells and batteries and the best practices for their safe use, handling, and storage.

What is a lithium battery training program?

This program (newly updated) is for employees shipping lithium batteries (ion or metal) by multiple modes of transport (air, ocean, and/or ground). This program covers all configuration of both large and small excepted batteries. The training is based on the current edition of the IATA Dangerous Goods Regulations, IMDG Code and 49 CFR.

Who should take the lithium batteries course?

Primary Audience: This lithium batteries course is intended for shippers, freight forwarders, and hazmat employees involved in the handling, shipping, and/or transport of Lithium Batteries by air and vessel, including spares and replacement lithium batteries, lithium batteries contained in equipment, and lithium batteries packed with equipment.

What is shipping lithium batteries training?

This shipping lithium batteries training is based on the requirements outlined in the most current version of the International Maritime Dangerous Goods Code (IMDG Code), and complies with the training requirements of Title 49 of the U.S. Code of Federal Regulations, Part 172, Subpart H, Section 172.704 (49 CFR) and the IMDG Code.

What do I need to learn about lithium batteries?

Participants need basic electrical knowledge, grasp of environmental science, and interest in green tech and sustainability. Gain insight into a topic and learn the fundamentals. Learn at your own pace Identify the components and types of lithium batteries. Understand the chemical and functional principles of lithium batteries.

Take this course at an IATA Training Center, Regional Training Partner, or on-demand as in-house training. ... Each participant will receive a complimentary copy of the latest valid IATA Lithium Batteries Shipping Regulations (LBSR) manual in e-book format. It is an indispensable field publication that you will refer to throughout this course ...

Over 250 Courses delivered in 2023 with 99.4% Positive Feedback | 99.6 % of attendees stated we created a

Lithium battery training courses

relaxed environment for learning | 100% of attendees stated the trainer interacted well with the group | 99.3% of attendees stated the objectives of the training were met | 99.3 % of attendees stated they felt they could implement what they had learned at work

The courses comprise topics such as Batteries and their types, applications, architecture, Cell Chemistries, Battery Charging its Modes & Standards, Battery Management Systems, Cell Balancing, Wire Harness, and Battery ...

Learn from battery industry leaders in the comfort of your home or workplace by participating in our 12-weeks online course. BatteryMBA provides a combination of in-depth technical and business knowledge on a range of battery topics aligned with the sector's dynamic growth.

Learn from battery industry leaders in the comfort of your home or workplace by participating in our 12-weeks online course. BatteryMBA provides a combination of in-depth technical and business knowledge on a range of battery topics ...

Enroll in Lithium-Ion Battery Awareness online Safety Training Courses Today - 24/7 course access & affordable course prices | OSHA Authorized training courses. 15% Discount on OSHA 10 & 30 Courses - Code: MY15. help@oshaoutreachcourses +1-833-212-6742; Call Us: +1 ...

This online training course presents an overview of the rules and regulations associated with the safe air transport of lithium batteries. As a Class 9 HAZMAT, lithium battery shipment by air must meet strict safety standards to reduce the hazards associated with transporting batteries.

This interactive course is designed to inform and empower shipping professionals to correctly identify, classify, document, pack, mark, and label lithium batteries that are being transported ...

A lithium-ion battery or Li-ion battery (abbreviated as LIB) is a type of rechargeable battery. ... Solar Technician ITI course, Government solar training 2020, Government certificate course in solar Energy, Solar certificate course. Admission procedure: Step one: Admission for the EV Battery Engineer will start from 28th Sept 2021.

The shipper training course can be undertaken in your own time at your own pace and CCA Approved. Lithium Battery Training, by DG Online. ... Previously covered under Category 1 Lithium Battery Training. Skip to content. Info@dgonline.training +44 (0)800 644 6799; We offer the only UK CAA approved online dangerous goods by air training. We are ...

This course focuses on the foundational research about lithium-ion batteries, thermal runaway and how fire and explosion hazards can develop. The knowledge you gain in this course can help you identify the risks associated ...

Lithium battery training courses

This program (newly updated) is for employees shipping lithium batteries (ion or metal) by multiple modes of transport (air, ocean, and/or ground). This program covers all configuration of both large and small excepted batteries. The training is based on the current edition of the IATA Dangerous Goods Regulations, IMDG Code and 49 CFR.

This course provides a foundation for understanding the general principles and fundamentals of lithium-ion (Li-Ion) rechargeable battery engineering. The effects of Li-Ion cell chemical, electrical, thermal, and mechanical design features on performance characteristics will be discussed in terms of meeting application unique requirements for ...

The lithium-ion battery safety course is aimed at all employees who use lithium-powered devices, providing awareness-level training on the risks and how to respond in emergencies. The Managing Lithium-ion Batteries course is for senior staff and managers who need to understand their legal responsibilities and manage risks at an organisational ...

This free online course will teach you about the science behind batteries and their function. We will take you through the different battery types and how they work. Learn about safety equipment and the safety precautions of battery technologies you need to ...

This course provides required safety training for employees who handle lithium batteries in the workplace, including "hazmat employees" who package, mark, label, load, unload, handle or ...

ISM Code 6.5 stresses the importance of identifying and providing necessary training to support safety management systems. The "Lithium-ion Battery Safety on Ships" course aligns with this mandate, offering in-depth insights into lithium-ion battery safety to ensure all personnel have essential training for safe marine operations. 3.

About the course. It is a legal requirement that all persons preparing dangerous goods for transport, such as lithium batteries, receive the training mandated by ADR Chapter 1.3 and function-specific training mandated by the IMDG Code.. Our online training course will teach you how to ship lithium batteries to the UN provisions, using ADR as the main reference whilst also ...

Our Lithium Battery Shipping training courses are entirely online, and we give over 20,000 students a year the proper certification they need to promote a safe workplace. Enroll in our Lithium Battery Hazmat course today and receive your hazmat shipping certification when it's convenient for you. We'll give you everything you need to become ...

Trusted Battery Training at EEU . Offering industry-leading battery training - online, in-person, and virtual - Eagle Eye University is trusted by: Fortune 500 Companies; Major Utility and Telecom Corporations; Government Organizations, including the FAA (Federal Aviation Administration) And More! We deliver the gold standard in battery ...

Lithium battery training courses

Eduwhere's combined DOT, IATA, and IMDG Lithium Battery Training teaches you how to safely ship a variety of batteries by both air (IATA), ground (DOT ... Shipping Batteries (DOT, IATA, and IMDG) Course Details. Lithium batteries and cells have made news in recent years for several instances of exploding while in transport, injuring people ...

The courses comprise topics such as Batteries and their types, applications, architecture, Cell Chemistries, Battery Charging its Modes & Standards, Battery Management Systems, Cell Balancing, Wire Harness, and Battery Connectors. Applied Learning Project. This Specialization will include a lab project in Course 5.

LITHIUM-ION BATTERY TRAINING FROM ... Receive one credit hour toward your AMT and IA refresher certification when you complete these 7 on-demand courses. GET STARTED. Play Video. Facebook. ... True Blue Power is the world's first company to engineer and certify lithium-ion batteries for aviation. Our lithium experience is backed by more than ...

Designed to be standalone or supplemental to dangerous goods by air, ground, or vessel training programs, these modal and multimodal courses focus on information specific to shipping ...

Emergency Response requirements associated with Lithium Batteries; Who Should Take Lithium Battery Training. These courses are intended for shippers, freight forwarders, and hazmat employees involved in the handling, shipping, and/or transport of Lithium Batteries by air, ground, and/or vessel, including equipment containing lithium batteries ...

Shipping Lithium Batteries and Cells Training . Duration: Approximately 2.5 - 3 hours. Course Description: If your company ships lithium ion or lithium metal batteries, the U.S. Department of Transportation requires the training specified in 49 CFR Part 172, Subpart H. This online course meets the U.S. DOT training requirements for individuals who perform or direct the functions of ...

Lithium Battery Training. 7.1 - Personnel preparing Lithium Battery Consignments (Packing Instructions 965-970 Section I, IA & IB) ... Training & Assessment Centre accreditation, we are offering a 10% discount off all our dangerous goods by air training courses.

This course can also be taken for academic credit as ECEA 5730, part of CU Boulder's Master of Science in Electrical Engineering degree. This course will provide you with a firm foundation in lithium-ion cell terminology and function and in battery-management-system requirements as needed by the remainder of the specialization.

Our Lithium Battery Hazmat Courses provide full hazardous materials/dangerous goods training to ship lithium batteries by ground, air, and vessel in compliance with 49 CFR, the IATA DGR, and the IMDG Code.

For lithium battery air shippers, the IATA Dangerous Goods Regulations (DGR) require recurrent hazmat

Lithium battery training courses

training every 24 months. Certificate issued? Certificate issued? Reliable online training to ship lithium batteries by ground, air, or vessel using DOT, IATA, and IMDG regulations. Lithium battery training courses avail. online.

Air carriers, working closely with the FAA, use their Safety Management Systems (SMS) to evaluate their ability to safely carry lithium batteries and determine safety mitigation strategies. FAA resources can be found at:

This short course provides participants with an in-depth discussion on three aspects of lithium-ion (Li-ion) batteries. First an understanding of Li-ion battery fundamentals is provided through a brief discussion centered on the aerospace industry's choice to use Li-ion batteries, general performance characteristics, electrochemical reaction ...
