

A team of Chinese researchers has made a groundbreaking breakthrough to revive aging lithium batteries by injecting a “shot” of lithium ions, potentially extending their lifespan from the typical 6-8 years or 1,000-1,500 ...

The battery industry moves at a fast pace: The articles Battery Technology publishes represent only a fraction of what's happening in this quickly evolving industry. That's the idea behind this curated and regularly updated ...

The lithium battery industry is changing quickly. To stay competitive in 2025, distributors need to be on top of new lithium battery technologies. From fresh innovations to shifts in regulations, ...

GCC battery materials (Graphite, Cobalt, and Cathode) serve as the backbone of lithium-ion battery technology, with cathode materials alone accounting for over 40% of a battery's total cost.

Octillion Power Systems, a California-based supplier of high-density lithium-ion battery packs for electric vehicles of all types, has expanded its existing partnership with Vision Marine ...

Graphite ore in mine. (credit: RHJ/iStock) China controls more than 95% of the global supply of battery-grade graphite, the largest component by weight in lithium-ion batteries. China's low ...

Just five days earlier, Anhui-based Gotion unveiled plans to set up a \$2 billion EV lithium battery manufacturing plant in Illinois, the United States. Located in the city of Manteno, the facility is expected to produce 10 gigawatt ...

There are 1,450 Lithium Ion Batteries startups which include SunPower, Greenfuel Energy Solutions, 24m Technologies, SES, Amprius Technologies. Out of these, 312 startups are funded, with 197 having secured ...

Mathematical Framework Enhances High-Nickel Cathodes for Superior Batteries A novel mathematical framework enables flexible gradient designs in high-nickel cathodes, improving lithium-ion battery performance, ...

Looking ahead, the chairman said, “Our investments in lithium-ion technology, alongside the continued strength of our lead-acid battery business, position us well to meet evolving energy ...

Here are a couple of key lithium battery technology: Solid-State Batteries: A newer type of battery with the potential for more energy and better safety. Advanced Battery Management Systems ...

July 2, 2025 Vanadium Redox Flow Batteries: A Safer Alternative to Lithium-Ion Technology As the global push for renewable energy accelerates, the demand for safe, sustainable, and ...

CATL, a Chinese company that is the world's largest producer of electric vehicle batteries, displayed at the Shanghai auto show in April a lithium-ion battery that can be recharged in five ...

Once completed, the plant is expected to produce 10 gigawatt-hours, or GWh, of lithium-ion battery packs and 40 GWh of lithiumion battery cells. Dan Seals, CEO of Intersect Illinois, an economic development organization, said ...

Exide charts growth path with focus on lead-acid, lithium-ion batteries Sustainability is embedded in our operations from green energy adoption and eco-friendly products to expanded recycling capacity and green logistics, Roy ...

Lithium-ion technology offers a smarter, more sustainable alternative. Li-ion batteries deliver up to three times the service life of conventional systems, require no maintenance, and eliminate the ...

The GC2 48V lithium-ion battery is a high-performance power solution designed for golf carts and low-speed EVs, offering modular scalability (30-90Ah+ capacities), LiFePO4 chemistry for ...

Tesla has confirmed that its first lithium iron phosphate (LFP) battery cell manufacturing facility in North America is nearing completion in Sparks, Nevada. The announcement, shared via the ...

Kalmar launches next-generation lithium-ion battery technology for electric counter balanced equipment portfolio Kalmar has introduced its second-generation lithium-ion (Li-ion) battery ...

Detailed info and reviews on 19 top Lithium Ion Battery companies and startups in California in 2025. Get the latest updates on their products, jobs, funding, investors, founders ...

The 36V GC2 lithium-ion battery is engineered for powering low-speed electric vehicles like golf carts and mobility scooters, providing high-capacity energy storage with integrated battery ...

China's Top 15 Lithium-Ion Battery Manufacturers (2025) China dominates the global lithium-ion battery market, supplying ~70% of worldwide capacity and housing innovation leaders driving ...
