Can a lithium battery keep a trolling motor at the same speed?

A lithium battery can keep your trolling motor at the same speed for almost twice as long as lead-acid batteries of the same rated capacity. A lead-acid battery should only be discharged to roughly half of its rated capacity (Ah), which means you need to get a battery double the capacity you actually want to use.

What are the best batteries for a trolling motor?

Where we basically had a cranking battery and a deep cycle lead acid battery for our trolling motors, now we have a plethora of options from AGMs to Lithium and of course still lead acids. The marine batteries of today are some of the best trolling motor batteries and best marine electronics batteries we've ever had at our disposal.

What battery does a lithium trolling motor use?

LiTime's new 12V 100Ah Bluetooth TM battery (B0D53YGQLG), designed for all trolling motors with smart system (Bluetooth 5.0). LiTime 36V 55Ah TM LiFePO4 Battery (B0CNXQ6813).

What are the benefits of lithium trolling motor batteries?

Another benefit of the reduced weight is the ability to draft in shallower water, potentially into back-water areas with lower fishing pressure. Another notable advantage of lithium trolling motor batteries includes longer run times without battery voltage drop and the potential for quicker charging cycles.

What are trolling motor batteries made of?

The latest and greatest trolling motor batteries are made of lithium iron phosphate. Unlike heavy, bulky lead-acid batteries, lithium is lighter and more compact. The compound also handles power more efficiently and lasts considerably longer with a greater tolerance for recharging.

Can I charge my trolling motor battery while running my outboard engine?

Absolutely, you can charge your trolling motor battery while running your outboard engine. Some drop-in lithium batteries can be charged with any charger designed for lead-acid batteries.
