In Miami, Trust Solaris the best local solar company. Our team of experts rates it 5.00 stars, so it's a great choice if you're looking to add solar panels to your house. What are the best and worst things about solar power?

How do I choose a solar company?

Solar companies that are licensed, insured and hold certifications take their business seriously. Look for companies that have NABCEP Certified professionals or certified electricians on staff and are properly insured, so their workers, and you, are protected. Not everyone has thousands of dollars to spend on a solar panel installation.

Should you hire a solar installer?

Solar is a growing industry that attracts contractors from many backgrounds--sometimes only loosely related to solar. But to feel confident in your solar panels, you'll want to work with an installer that has plenty of experience in custom designing systems.

What does a solar installer do?

According to the , "Solar photovoltaic (PV) installers assemble, set up, and maintain rooftop or other systems that convert sunlight into energy... Most solar panel installations are done outdoors, but PV installers sometimes work in attics and crawl spaces to connect panels to the electrical grid."

What makes a good solar installer?

Availability (10%): The bigger the service area, the higher the company will score. Transparency and accessibility (5%): Solar installers that offer free consultations and easy contact methods score higher in this category.

Some solar companies rely on subcontractors to perform some-or all-the work during your solar installation. Don't let this put you off: It's entirely standard procedure in the industry. What is alarming, though, is a lack of transparency from installers about who will install your system and why they use subcontractors.
