

Why do people support wind energy?

"Public support for wind energy has been consistent over the years. People understand and recognise the benefits of renewable energysuch as wind," says Oillic. This,he adds,can only grow as our understanding of the damage climate change continues to wreak becomes more evident.

How has public perception of wind power changed over the last 4 decades?

The public perception of wind power has shiftedover the last four decades but understanding why that is has been a major challenge. We look back at how public concerns have shaped the sector and how they can be addressed. "A consistent 70-80% of people are in favour" of wind power,according to Maxime Ollic. Credit: Rehman Abubakr

Are 80% of people in favour of wind power?

"A consistent 70-80%of people are in favour" of wind power,according to Maxime Ollic. Credit: Rehman Abubakr "The tranquillity and natural beauty of this area has been ruined by the ever-increasing number of windfarms being created."

When did wind power start?

The decade singled the beginning of wind power on a mass scale,with the opening of the Crotched Mountain facility in the US in 1980. Just 11 years later and the opening of a farm off the coast of Denmark heralded the introduction of offshore power.

Are people in favour of wind power in Europe?

However,it's not a view shared by Maxime Oillic of industry body WindEurope. "Opinion polls show that the public across Europe is very supportive of wind energy. A consistent 70-80% of people are in favour," he says. However he accepts there is likely a difference in attitudes towards wind power in general and windfarms in particular.

What did Borgmann think about windmills?

Both European and American windmills,according to Borgmann's paradigm,functioned as focal things-technological artefacts that connected their users and communities to both landscape and wind.
