

Just starting to design a 12v/120v system for a travel trailer with PV, LiFePo4 batteries and 30Amp shore power connection. I'd like to use a Multiplus 12/120/3k as well as a SmartSolar MPPT ...

Any solution, I ask Chat gpt and he told me to upgrade the cable double it. and update the cerbo software to 3.62, here is a setting that allows you to take the voltage in the BMS instead the ...
