

Energy storage technology has advanced by leaps and bounds in recent years, offering a range of benefits for manufacturing facilities. From reducing energy costs and improving grid stability to ...

In the face of volatile energy pricing and grid instability, energy solutions specialist Aggreko is highlighting the potential for battery energy storage systems (BESS) and battery hybrids to help increase resilience and on-site efficiency.

Governor Josh Shapiro joined Verne Inc. Co-Founder David Jaramillo and local leaders to announce that Verne Inc. -- a California-based energy storage innovator -- will open its first ...

On July 23, Desay Battery, a prominent global supplier of energy storage solutions, held a major production launch event in Changsha, China. The occasion highlighted a new lineup of safety ...

Autowell Intelligent Equipment (ATW) has officially received CE certification from TÜV Rheinland for its energy storage production line, following a rigorous, full-process audit, the milestone affirming its commitment to ...

Building on its "Everything as a Grid" perspective, Eaton's model treats factories as active energy hubs. Instead of being passive loads that only consume power, facilities gain the ability to ...

On July 4, 2025, President Trump signed into law the One Big Beautiful Bill Act (H.R. 1 119th Congress) (OBBBA), which significantly changes the clean energy tax credit landscape established by the Biden administration pursuant to the ...

Over 20 GWh of planned energy storage cell capacity for 2028 have been cancelled so far this year, according to the Q2 2025 reports on energy storage supply, technology, policy and ...

The global market for hydrogen storage alloys used in Nickel-Metal Hydride (Ni-MH) batteries is experiencing steady growth, driven by increasing demand for energy storage solutions in ...

SLB, a global leader in energy technology, has been awarded a key contract to support carbon storage site development in the North Sea by the Northern Endurance Partnership (NEP). This ...

The 500Ah+ large energy storage battery cell technology is rapidly emerging, demanding significantly higher efficiency from thermal management systems. Liquid cooling plate design ...

As global demand for clean, efficient power rises, BESS manufacturing is becoming central to the development of sustainable energy networks, offering reliable energy storage and promoting ...

In the face of volatile energy pricing and grid instability, energy solutions specialist Aggreko is highlighting the potential for battery energy storage systems (BESS) and battery hybrids to ...

Lyten will take full ownership of Northvolt Dwa ESS, Europe's largest energy storage systems manufacturing operation, located in Gdansk, Poland. Lyten intends to immediately restart ...

DuBOIS -- Penn State DuBois and Metaltech Inc., a local leader in powdered metal manufacturing, are teaming up on a new research initiative focused on next-generation energy ...

In the face of volatile energy pricing and grid instability, Aggreko is highlighting the potential for battery energy storage systems (BESS) and battery hybrids to help increase resilience and on ...

Energy Storage Solutions for Manufacturing Facilities In the industrial landscape, the quest for operational efficiency has become more essential than ever. Operations Directors in industrial ...

Moment Energy announced that its Metro Vancouver, BC manufacturing hub is now in full-scale production, delivering its flagship battery energy storage systems (BESS) to serve a growing ...

According to a latest report from market intelligence firm Clean Energy Associates (CEA), the U.S. energy storage system (ESS) battery manufacturing capacity is facing severe challenges. As ...

The challenge with Renewable Energy sources arises due to their varying nature with time, climate, season or geographic location. Energy Storage Systems (ESS) can be used for storing available energy from Renewable ...
