

Magellan Power seeks \$15 million in external investment to scale up production of its commercial energy storage systems and residential batteries while expanding operations across Western ...

On July 4, 2025, President Trump signed into law the One Big Beautiful Bill Act (H.R. 1 119th Congress) (OBBBA), which significantly changes the clean energy tax credit landscape established by the Biden administration pursuant to the ...

On July 4, 2025, President Trump signed into law the One Big Beautiful Bill Act (the OBBB), which significantly rolls back many of the core tax incentives that clean energy projects have relied ...

The 500Ah+ large energy storage battery cell technology is rapidly emerging, demanding significantly higher efficiency from thermal management systems. Liquid cooling plate design ...

After three months of tailored support from EnergyLab and New Energy Nexus, these founders now stand poised to accelerate the country's battery manufacturing capabilities - with ...

From the perspective of PCB design and manufacturing, this article discusses the key elements in energy storage PCB design and manufacturing, combined with PCB design specifications to ...

Explore how ACE Battery leads in sustainable energy storage with green manufacturing, global certifications, and customized ESS built for long-term impact. As the global demand for clean ...

Google enters long-duration energy storage (LDES) with a global commercial partnership and investment in Energy Dome. Energy Dome's CO2 Battery stores clean energy for 8-24 hours, ...

SLB, a global leader in energy technology, has been awarded a key contract to support carbon storage site development in the North Sea by the Northern Endurance Partnership (NEP). This ...

Energy storage and all other types of power projects (i.e., other than solar and wind) have until the end of 2033 to start construction to qualify for technology-neutral tax credits at the full rate. ...

On July 4, President Trump signed the "One Big Beautiful Bill." The bill makes steep cuts to solar energy and places new restrictions on energy tax credits that will slow the deployment of ...

Renewable energy storage specialist Aputura said it had received planning consent to build a new grid-scale 560-megawatt battery energy storage system (BESS) near Clydebank in West ...

Moment Energy announced that its Metro Vancouver, BC manufacturing hub is now in full-scale production, delivering its flagship battery energy storage systems (BESS) to serve a growing ...

Energy storage technology provides you with lithium battery technology, silicon-carbon negative electrode, solid-state battery technology and application scenarios, such as electric vehicles, two-wheel electric vehicles, ...

According to a latest report from market intelligence firm Clean Energy Associates (CEA), the U.S. energy storage system (ESS) battery manufacturing capacity is facing severe challenges. As ...

OLADE's technical note 10, entitled "Energy Storage in Latin America and the Caribbean - Current Status, Challenges and Strategic Recommendations" reports 2.5 GW of installed capacity in the region. Energy storage installations are ...

Lyten will take full ownership of Northvolt Dwa ESS, Europe's largest energy storage systems manufacturing operation, located in Gdansk, Poland. Lyten intends to immediately restart ...

In the face of volatile energy pricing and grid instability, energy solutions specialist Aggreko is highlighting the potential for battery energy storage systems (BESS) and battery hybrids to help increase resilience and on-site efficiency.
