

In this study, bidirectional single-phase PWM AC/DC converter that is used in microgrid systems at connection point to the grid, is modelled and controlled. PWM signals of ...

The conversion of the conventional DC-DC converter into a bidirectional converter can be achieved using a bidirectional switch with a diode, with the current flow in both paths being accepted by anti-parallel with an ...

bidirectional interleaved converter as a robust power interface operating in grid-connected and islanded modes  
ISSN 1752-1416 Received on 25th May 2019 ... The AC-microgrid-side ...

The interlinking converter in an AC / DC hybrid microgrid plays a crucial role in the stable operation and power allocation of power system. A bidirectional droop control method for the ...

In order to verify the feasibility of the bidirectional boost converter, a bidirectional boost converter built in the real-time digital simulator (RTDS) platform is shown in Fig. 4. The ESB is connected to the DC microgrid ...

Lai et al. implemented a two-phase, interleaved, bidirectional DC-DC converter topology for electric vehicles and DC microgrids. The results indicated that this design effectively minimized output ripple, achieving efficiencies of 98.4% in ...

1.1. Motivation. Amid the growing global energy crisis, microgrids are seen as a crucial strategy for tackling energy issues. This research study focuses on improving the smooth operation of ...

Electronics. The conventional bidirectional DC-DC converter (BDC), which employs a half-bridge configuration, has some major disadvantages, including a controller designed for one direction ...

This paper presents a non-isolated bidirectional softswitching dc-dc converter for DC microgrid energy storage synchronization. To assist the soft switching of switches and diodes, the LCL ...

Keywords Microgrid &#183; Bidirectional power flow &#183; DC-DC converter &#183; Modular configuration B Reza Haghmaram rhaghmrm@ihu.ac Farzad Sedaghati ... PV-based DC microgrid, PV ...

The bidirectional converter in a microgrid is essential as it monitors the overall functions of the grid, acts as a static compensator (STATCOM)m injecting reactive power to ...
