

Increased energy demand and the continued role of fossil fuels in the energy system mean emissions could continue rising through 2025-35. Emissions have not yet peaked, and global CO₂ emissions from combustion ...

On 15 July, national plans for energy storage were set out by the Chinese National Development and Reform Commission and National Energy Administration. The main goals of new energy ...

Our modeling projects installation of 30 to 40 GW power capacity and one TWh energy capacity by 2025 under a fast decarbonization scenario. A key milestone for LDES is reached when renewable energy (RE) ...

Bloomberg New Energy Finance (BNEF) sees pack manufacturing costs dropping further, by about 20% by 2025, whereas cell production costs decrease by only 10% relative to their historic low in 2021. This warrants further analysis based ...

In 2023, the global energy storage market experienced its most significant expansion on record, nearly tripling. This surge occurred amidst unprecedentedly low prices, particularly noticeable in China where, as of ...

The CLNB 2025 (10th) China International New Energy Industry Expo, hosted by Shanghai Metals Market (SMM), will be held at the Suzhou International Expo Center from April 16th to ...

Energy and climate-related policies have been accelerated by both state and federal governments, and for many companies the time feels right to invest in energy storage. This event gathers together investors, developers, ...

VRET progress reports. The VRET progress reports show how we are progressing towards our renewable energy, storage and offshore wind targets. For 2023/24, renewable energy was 37.8% of Victoria's electricity ...

To triple global renewable energy capacity by 2030 while maintaining electricity security, energy storage needs to increase six-times. To facilitate the rapid uptake of new solar PV and wind, global energy storage capacity increases to 1 500 ...

In July 2021 China announced plans to install over 30 GW of energy storage by 2025 (excluding pumped-storage hydropower), a more than three-fold increase on its installed capacity as of 2022. The United States' Inflation Reduction Act, ...

New Energy Storage Report 2025

China once again exceeded expectations for electric car sales in 2022, reaching a sales share of around 29%. As such, the government's target of 20% new energy vehicle sales in 2025 was comfortably met three years ahead of time. China ...
