About these feeds: These images are from observatories around the world. Most of them are webcam images that are near-real-time, typically captured within the last 5 - 15 minutes. At this stage the only live video stream is from the Subaru telescope.. Some of these cameras show only night-time views, some only day-time, some show both.

It's setting by the time the sky is fully dark. Saturn is visible toward the southeast as soon as it gets dark out, and sets by dawn. Mars rises around midnight all month. By dawn it has climbed quite high into the south-southeastern sky, appearing together with Jupiter. Now, Jupiter is rising in the first half of the night.

2 days ago&#0183; Find out the position and brightness of planets, comets, asteroids and more in the night sky. Use the interactive sky map to visualize the Solar System objects at any date and time.

6 days ago&#0183; Navigate the night sky. Download a sky map for the current month. Spot the Station. Choose your state, then city to see when the International Space Station can be seen crossing the sky. Bookmark this page as your one-stop planning resource for astronomy events. Note: By clicking any of these links, you will be leaving the NASA domain.

2 days ago&#0183; Sky Sports will show 128 games exclusively live in the 2024/25 season - and a brand new agreement between Sky Sports and the Premier League means even more live matches from 2025/26.
