

Do government photovoltaic subsidies affect enterprise independent innovation in China?

Achieving a green, low-carbon economy necessitates clarifying the impacts of government photovoltaic (PV) subsidies on enterprise independent innovation in China. This study constructs a tripartite evolutionary game model among government, enterprises, and energy regulatory service centers (ERSC).

Do government subsidies promote Enterprise Innovation in the PV industry?

The purpose of this research is to explore the impacts of government subsidies on promoting enterprise innovation in the PV industry in pursuit of renewable energy goals. Theoretical analysis shows that government subsidies play an essential role in promoting enterprises innovation.

Can government subsidies help the photovoltaic industry?

With regard to the photovoltaic industry, Lu and Shao (2016) believed that government subsidies could improve the enthusiasm of photovoltaic enterprises for innovation and promote healthy development.

Is Chinese photovoltaic industry a strategic emerging industry?

As a strategic emerging industry, the rapid expansion and technological innovation of Chinese PV industry cannot be separated from the support of national policies and funds. What is the current status of innovation in Chinese photovoltaic industry? Is it effective?

How do PV Enterprises get energy subsidies?

PV enterprises can submit requests for energy subsidies to ERSC, which then presents these requests to relevant government departments. The ERSC serves as an information hub, providing feedback on government policies to enterprises and offering guidance and recommendations.

Is China a leader in solar PV innovation?

Studies on innovation issue of China's solar PV industry are few. Zhang and Gallagher (2016) reviewed how China fitted into the global solar PV innovation system, while Huang et al. (2016) analyzed how China became a leader in solar PV by the framework of Technological Innovation System (TIS).
