

SK On has inked a deal with EcoPro Innovation to source up to 6,000 metric tons of Korean-produced lithium hydroxide for its U.S. EV battery plants, boosting supply chain resilience, ...

RECOMMENDED ARTICLES In the past decade, traditional leaders like Toyota, Panasonic, and Samsung have been investing heavily in solid-state battery research and development.

In response to these vulnerabilities, NIFoS commenced the development of solid electrolytes for next-generation secondary batteries in 2023. They crafted a cellulose derivative film derived ...

The global market for batteries used in solar energy storage is experiencing robust growth, driven by increasing demand for renewable energy sources and grid stabilization solutions. The ...

China has helped power millions of electric vehicles around the world in 2023, responsible for over three-fifths of global installations of power batteries -- the muscle at the heart of EVs. South Korean market consultancy ...

The automotive industry's growth, particularly in geographies such as China, Europe, and North America, significantly contributes majorly for the growth of lithium ion battery market. The surge in electric vehicle production, ...

The aircraft lithium-sulfur battery market is poised for significant growth, driven by the increasing demand for lighter, more energy-dense batteries in the aviation sector. The inherent ...

Williams thought he had hired remote IT workers for his Atlanta-based blockchain research and development company, Starter Labs. Instead, the "workers" were North Korean nationals using ...

Park Ki-soo, right, head of research and development at SK On, poses with Noh Jin-pyo, head of functional safety and cybersecurity in Asia Pacific at TUV Rheinland, at a certification awarding ...

Korean companies are investing heavily in research and development, with a focus on improving battery efficiency, safety, and affordability. The Korean government is providing significant ...

The porous silicon-based anode material market is experiencing robust growth, driven by the increasing demand for high-energy-density batteries in electric vehicles (EVs), portable ...

The world of Artificial Intelligence (AI) has witnessed a significant surge in recent years, with various

countries and organizations investing heavily in AI research and development. Among ...

The battery assembly adhesives market is experiencing robust growth, driven by the burgeoning electric vehicle (EV) and energy storage system (ESS) sectors. The market's expansion is ...

In Korea, technologies for ensuring lithium battery safety are evolving as well. Hyundai Mobis developed a technology to prevent battery overheating last year, and in April, it unveiled an ...

Behind this transformative discovery is Dr. Jungdon Suk and his team at the Korea Research Institute of Chemical Technology (KRICT). Their innovation may finally resolve one of the most ...

NREL's electrochemical storage research ranges from materials discovery and development to advanced electrode design, cell evaluation, system design and development, engendering analysis, and lifetime analysis of ...

Secondly, ongoing research and development efforts are leading to advancements in battery technology, including improved energy density, safety, and lifespan, all of which increase the ...

Korean Breakthrough Makes Lithium-Metal Batteries Safer for EVs with Solvent-Free Tech to Prevent Dendrites and Surface Damage In a major advancement for electric vehicle (EV) battery technology, a South Korean research team has ...

The global polyolefin ceramic coated separator market is experiencing robust growth, projected to reach \$1790 million in 2025 and maintain a Compound Annual Growth Rate (CAGR) of 24.4% from 2025 to 2033. This significant ...

Access to solar panels has created capacity where the state falls short, but the overall energy security challenges facing the nation are daunting. This report, "North Korea's Energy Sector," is a compilation of articles ...

North korea battery research and development
