Should you put solar panels on your roof?

MARY LOUISE KELLY, HOST: Using rooftop solar panels to power a home is great for the environment, but it is not always a good deal for consumers. Keith Romer from our Planet Money program tried to understand why. KEITH ROMER, BYLINE: It's a good pitch. Put solar panels on your roof, and you can lower or maybe even eliminate your electric bills.

Are solar panels producing electricity?

Almost two years later, Krieg says the panels aren't producing electricity, and she's still fighting with the companies involved. "Solar Sandy" is actually Sandra Cordero, a 63-year-old grandmother who says she used to be a nurse. Her business is a sales-only enterprise. Other companies actually install the solar panels she sells.

Should you install solar panels on Your House?

There are a lot of good reasons to install solar panels on your house. If your state generates most of its electricity from fossil fuels, producing your own power from the sun will reduce your contribution to climate change. And solar panels can save money on utility bills. But they aren't for everyone.

Is there a way to sell solar panels?

There's no way. ROMER: Halty says some solar companies incentivize salespeople by letting them overcharge customers and pocket the difference. HALTY: You could sell it for as high as you'd like - as high as the homeowner would say yes to.

Are there unscrupulous characters operating in the solar space?

WIDAWSKY: The fact is that there are some unscrupulous characters operating in the solar space. SIMON: Widawsky says the EPA is helping local governments and communities create lists of reputable solar actors who can get the money to help build trust in solar. The EPA expects the solar program to help over 900,000 households.

Where can I find a good solar installer?

Horowitz's group has a solar help desk where people can get answers to common questions and feedback on solar proposals. SUN also suggests reviewing the list of installers certified by the North American Board of Certified Energy Practitioners.

A new Environmental Protection Agency program is giving \$7 billion to programs that fund rooftop solar panels, batteries to store solar energy and something called community solar. David Widawsky at the EPA says community solar allows renters and others who can't install panels to tap into solar energy generated at a shared site, like a solar farm.
