

Offshore wind power generation attracts attention toward realizing net zero by 2050. This article presents the anticipated role of Japan's offshore wind power generation along with its future ...

Current Status On Jan. 20, 2025, President Trump issued an executive order withdrawing areas within the Offshore Continental Shelf (OCS) for wind energy leasing, directing the secretary of the Interior to review existing ...

A massive component for the "next generation" of offshore wind turbines has been forged in China. Iraeta Forgings, a producer of advanced power equipment, announced last week that it ...

Mitsubishi Corporation Offshore Wind Ltd. (MCOW) took over Mitsubishi Corporation Energy Solutions Ltd. (MCES)'s offshore wind power generation business in July 2022, along with below three projects awarded to ...

The renewable energy landscape is undergoing significant changes, particularly as the future of offshore wind power faces uncertainties. While some clean energy initiatives stall, solar power continues to gain momentum both in the United ...

Offshore wind power development is the centerpiece of efforts in Massachusetts to reduce carbon emissions, grow energy jobs, and create home-grown power. While state lawmakers and governors have pursued the sector's growth for ...

On 26 June 2025, the Ministry of Industry and Trade (MOIT) issued Decision No. 1824/QD-BCT approving the electricity generation price framework for offshore wind power projects in 2025 ...

Getting offshore wind right is not a waiting game, it's a matter of design, says the Netherlands Enterprise Agency's (RVO) Henk van Elburg. And when it comes to designing for delivery, the ...

Floating offshore wind farms (FOWFs), as a key technology for harnessing deep-sea wind energy resources, face significant challenges due to the complex environmental loads at sea. Existing ...

?????.?3-1??:???????????????, Wind energy generation systems - Part 3-1: Design requirements for fixed offshore wind turbines, Wind energy generation systems -

A "next-generation" offshore wind support vessel has passed a major milestone after successfully completing sea trials. The Windcat Rotterdam is the company's first Elevation series craft ...

Offshore wind generation

Workers lift and install the tower of a wind turbine on the Baihetan offshore wind power installation platform as a 16-megawatt offshore wind turbine begins installation off Pingtan, Fujian province, on Saturday. LIN ...

An international offshore wind power training center has completed its overall design and is currently under construction in Shantou, Wen said. "The center fills the gap in offshore wind power training in Guangdong and, once ...

By the end of this decade, wind is expected to become the second largest source of global renewable electricity generation behind solar PV, surpassing generation from hydropower. ...

Offshore wind can generate large-scale clean energy with greater efficiency compared to onshore wind farms. Wind speeds are typically higher and more consistent at sea, resulting in greater ...

Offshore wind generation
