Eaton, in its commitment to achieve net-zero operations by 2050, will install a 4-MW solar system at one of its Wisconsin operations. Working with WEC Energy Group subsidiary We Energies, ...

Recurrent Energy is one of the world's largest and most geographically diversified utility-scale solar and energy storage project development, ownership and operations platforms. With an industry-leading ...

Through the first five record-setting solar and battery months of 2025, 11.5% of California's potential solar generation was curtailed to maintain grid balance. That's down from 13% over ...

DSD Renewables (DSD) and Baker Electric have completed a 797.07-kW solar installation paired with 1,146.88 kWh of battery energy storage for Frontwave Arena in Oceanside, California. The new Frontwave Arena serves as the ...

The California grid regularly breaks solar generation peak record levels. The latest solar peak recorded in late May was over 21,500 MW of solar generation. The state is also doubling down ...

Tesla has officially launched the first several Supercharging posts at a massive station in California, notably including solar canopies and grid-scale batteries to offer completely ...

Unlike non-renewable energy sources, solar power is infinitely renewable, environmentally friendly, and available in plenty across California's expansive territories. Beyond natural ...

For Californians seeking clean energy solutions and relief from rising electricity costs, the Self-Generation Incentive Program (SGIP) offers a compelling opportunity. Since its inception, SGIP has provided significant ...

Transparent solar windows that capture ultraviolet and infrared light are now available in the US, enabling buildings to generate clean energy while maintaining aesthetic appeal.

California has introduced a total of 25,000MW of new energy means to its grid since 2019, a majority being solar and battery storage. These efforts align with Newsom's plan to add ...

Solar Optimum, a leading force in renewable energy, is proud to announce its monumental achievement of retaining the coveted #1 California Residential Solar Contractor (EPC) ranking ...

Residential Solar Permit Reporting Program - SB 379 The Energy Commission's reporting hub for California cities and counties to annually provide data about online, ...

Palikir california solar energy

Solar energy is radiation from the Sun that is capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy incident on Earth is vastly in excess of the world's energy ...

EDPR NA Distributed Generation, the distributed generation business of EDP Renewables North America, and California Water Service have signed a 20-year PPA for a 2.35-MW DC onsite solar array at Cal Water's Northeast Bakersfield ...

As I'll explain here, this 22% difference in Peak Sun Hours will equate to a 22% difference in solar energy production. In solar energy applications, what truly counts isn't the hours between sunrise and sunset in a ...

These adverse state policy impacts exacerbated financing shifts, triggering plummeting demand and an 80% decrease in rooftop solar installation volume. The California Solar & Storage Association reports that the fallout ...

The California solar mandate is a critical regulation shaping the future of homebuilding and solar energy in the state. As part of California's broader clean energy goals, this solar panels California law requires that most ...
