

Pay schedule solar energy company

How does PG&E pay for solar energy?

You're paid for your solar energy at close to the same rate as you pay for grid energy. When you use more energy than you generate during a month (called a "billing cycle"), your PG&E meter tracks how much you used from the grid. When you generate more energy than you use during a month, your meter tracks how much you sent to the grid.

How do I pay for a solar system?

The two most cost-efficient ways to pay for your solar system are through a cash purchase or a solar loan. Generally speaking, these two options are the best way to go solar because you either own your own system right away or by the end of your loan.

How much will a solar power system cost in Hong Kong?

Under the new scheme, households and businesses that install renewable energy facilities, such as rooftop solar panels or wind systems, would be able to sell the clean electricity to the city's power grid at higher than market rates of HK\$3 (US\$0.38) to HK\$5 per unit of electricity, depending on capacity.

How to earn money from solar HK?

Just install a solar system on the roof or platform of an industrial building/commercial building/canopy/school and successfully connect to the CLP/HK Electric power grid to earn \$2.5 - \$4 electricity back. Purchasing SolarHK provides different commercial solar energy solutions such as sole proprietorship, profit sharing and joint venture sharing.

Should you pay for solar panels with cash?

Paying for your solar panel system with cash is the best way to maximize your savings from solar. You won't pay any additional interest like you will with a solar lease, and your electricity costs are taken care of for the next 25 years. You shouldn't have to pay an electric bill again - or if you do, a very small one.

How much electricity can a solar project generate a year?

Involving about 1 650 solar panels, it is estimated that the project can generate over 720 000 kWh of electricity annually, which is equivalent to the annual electricity consumption of more than 200 households. This will set a good example for better utilisation of agricultural land for RE development.
