How C channel steel can be used for PV solar project?

Our high quality galvanized C channel steel products are major supports for PV solar projects. They can be combined into building components such as lightweight roof trusses and brackets.

How to choose a solar panel support frame C section purlin?

The length of a C section purlin for a solar panel support frame can be determined according to the engineering design. C profiles are widely used in steel structures, including the C profiles and wall beams of buildings, which can be combined into building components such as lightweight roof trusses and brackets.

What is a C profile steel?

C profile steel is a type of steel molded using C purlin brackets forming machines, available in five specifications based on height: 80, 100, 120, 140, and 160.
