

# Photovoltaic inverter entry certificate

Do I need a building regulations certificate for my solar panel system?

You should receive a building regulations certificate, known as a completion certificate, for your solar panel system. This certificate will assure you and any future owners that the work met all building regulations, which will make it much easier to sell your property at any point.

Why do I need a solar panel certificate?

This certificate will assure you and any future owners that the work met all building regulations, which will make it much easier to sell your property at any point. Your installer should send you the certificate after they've commissioned your solar panel system. Can neighbours object to solar panels?

Do solar PV installations need to be MCS certified?

Also, the Council of Mortgage Lenders has advised that, as a minimum to avoid the risk of a property being ineligible for a mortgage, both new and existing Solar PV installations must be MCS certified. All renewable energy products are examined by certification bodies against MCS manufacturing and testing standards.

Are there any UK standards relating to a PV installation?

While many UK standards apply in general terms, at the time of writing there is still relatively little which specifically relates to a PV installation. However, there are two documents which specifically relate to the installation of these systems that are of particular relevance:

What are the requirements for a PV installation?

Virtually all domestic PV installations will fall under the scope of Part P. Part P requires the relevant Building Control department to be notified and approve the work. There are two routes to comply with the requirements of Part P: Notify the relevant Building Control department before starting the work.

Do I need a building regulations approval for a PV system?

Building Regulations approval may require the product to have passed the wind uplift, water penetration and spread of flame tests (see section 2.1.1.2). These will usually be applicable only where the PV is integrated into the fabric of the building.

PV value chain ??? Test report ??? Certificate ??? Test mark ???????? PV components ??? PV power plants PV inverters & PV electronics ?????? ??? ...

Kiwa can test your PV inverters and grid connections. Kiwa is also Notified Body on all relevant directives that apply to inverters - electromagnetic compatibility directive (EMC-D), low voltage ...

system performance, actual photovoltaic module output must be further modified by the operating parameters of the inverter and loads or utility interconnect characteristics. The inverter ...
