How to charge a 12V battery from a solar panel?

Here is the simple circuit to charge 12V, 1.3Ah rechargeable Lead-acid battery from the solar panel. This solar charger has current and voltage regulation and also has over voltage cut off facilities. This circuit may also be used to charge any battery at constant voltage because output voltage is adjustable.

Does a solar panel charge a battery?

The solar panel will also charge the battery but the charging time of the battery depends on the solar panel wattage, sunshine and ON/OFF condition of direct load. Related Solar Panel Wiring & Installation Diagrams: Wiring PV Panel to Charge Controller, 12V Battery & 12VDC Load.

How to control the voltage from a solar panel?

To be able to control the voltage from the solar panel usually a voltage regulator circuit is employed relating to the solar panel output and the battery input. This circuit ensures that the voltage from the solar panel by no means surpasses the safe value needed by the battery for charging.

What is a solar panel wiring diagram?

A solar panel wiring diagram (also known as a solar panel schematic) is a technical sketch detailing what equipment you need for a solar system as well as how everything should connect together. There's no such thing as a single correct diagram -- several wiring configurations can produce the same result.

What is the output voltage of solar battery charger?

Output Voltage - Variable (5V - 14V). Maximum output current - 0.29 Amps. Drop out voltage - 2 - 2.75V. Solar battery charger operated on the principle that the charge control circuit will produce the constant voltage. The charging current passes to LM317 voltage regulator through the diode D1.

What is a simple solar charger?

Simple solar charger are small devices which allow you to charge a battery quickly and cheaply, through solar energy. A simple solar charger must have 3 basic features built-in: It should be low cost. Layman friendly, and easy to build. Must be efficient enough to satisfy the fundamental battery charging needs.
