

Photovoltaic panel dispute case

What is the EU-China solar panel dispute?

This chapter examines the EU-China solar panel dispute, the largest trade defense investigation ever done by DG Trade. This chapter first provides background information about the European solar market, European Trade Commissioner Karel de Gucht, and the Option case. This provides useful context to the EU solar panel case.

Are US and China negotiating a trade dispute in solar photovoltaics?

While the US and China cooperated in renewable energy development, since 2011 the countries have engaged in a protracted and major trade dispute in the solar photovoltaics industry.

What is the solar PV trade dispute?

Historically, renewable energy industries formed unified advocacy coalitions (Meckling et al., 2015). An important feature of the solar PV trade dispute, however, is the division of the solar industry into protectionist and free trade advocacy coalitions in response to the rise in imports from China.

Why is the solar panel Anti-Dumping case a major trade dispute?

Therefore, the escalation of the solar panel anti-dumping case into a major trade dispute, which highlighted both the possible contradiction between the promotion of strategic industrial interests and the pursuit of common global climate goals, and the inadequacy of trade law to resolve it, attracted unprecedented attention.

How did the solar panel trade defence case turn into a political battle?

The solar panel trade defence case turned into a wider political battle when several Member States confronted the European Commission over its proposals as to how to solve these disputes.

Does the EU's solar panel trade dispute harm Europe's climate goals?

European Commission (2012b) The EU's investigation into solar panel imports from China does not harm Europe's climate goals.
