

# Photovoltaic panel manufacturers franchise cooperation model

What is co-operative innovation in the photovoltaic industry?

Cooperative innovation spread from the east to west in space and from the central area to surrounding cities. In terms of the industry chain, the initial innovation cooperation (in 2010) of the photovoltaic industry focused on mid-stream links such as solar cells and module manufacturing.

Does China have a business model for distributed solar photovoltaic (dspv)?

China is a world leader in the global solar photovoltaic industry, and has rapidly expanded its distributed solar photovoltaic (DSPV) power in recent years. However, China's DSPV power is still in its infancy. As such, its business model is still in the exploratory stage, and faces many developmental obstacles.

Is the photovoltaic industry a new third-party owned business model?

96. Wang, W. A new third-party owned business model-taking the photovoltaic industry as an example. *Sci. Wealth* 2018, 12.

How can a market-centric business model help solar PV companies?

The disruptive nature of solar PV technology, limited awareness and high financial requirements often make solar PV disadvantaged compared with its competition. A market-centric business model can help solar PV companies address consumers' concerns while offering solutions to enhance its adoption.

How do community business models affect distributed solar PV?

Huijben and Verbong identified that business models providing different ownership structures facilitated the development and growth of distributed solar PV. Amus suggested that adopting a community business model addressed infrastructural hindrances, making it cost-efficient for consumers to utilise solar PV.
