

Photovoltaic panel quality warranty

What is a solar panel warranty?

Solar panel warranties are more than just a piece of paper; they are a crucial safety net for anyone considering investing in solar energy. They offer a guarantee that you get the most out of your solar panels.

What makes a good solar panel performance warranty?

An ideal solar panel performance warranty should include the following conditions: Certain solar manufacturers may even guarantee a degradation rate as low as 0.25% per year, coupled with a performance warranty period of up to 30 years.

Are solar panel warranties a good investment?

Understanding and comparing solar panel warranties are crucial steps in your solar investment journey. They not only provide a safety net for your investment but also serve as an indicator of the quality and reliability of the product.

What is a power warranty?

Power warranties, or performance warranties, are commonly associated with renewable energy equipment like solar panels and wind turbines. Photovoltaic (PV) cells experience a gradual performance decline, resulting in a slight annual reduction in electricity generation.

What is the warranty start date of solar modules?

The warranty start date of the Solar Modules stipulated under this Limited Warranty for Solar Modules (hereinafter referred to as "Limited Warranty") is the date of delivery to the Initial Customer or 6 months after the modules are shipped out of the production plant, whichever is earlier (hereinafter referred to "Warranty Start Date").
