

Photovoltaic panel sorting machine

How does the automatic module sorting machine work?

The automatic module sorting machine sorts the modules according to test results. Need help in choosing the best machine and technological solution to meet your needs? Contact us to learn more about the customised solutions that our engineering team is able to develop. How did you hear about us? *Message* Accept the Privacy Policy

Do you offer a complete set of PV machines?

We offer a complete set of PV machines covering all solar manufacturing processes. We offer complete solar panel production lines for global customers to manufacture photovoltaic modules based on their specific requirements.

Why should you choose horad solar panel production lines?

We offer complete solar panel production lines for global customers to manufacture photovoltaic modules based on their specific requirements. Since foundation, Horad has been committed to becoming a leading manufacturer of intelligent PV panel production lines by focusing on the solar panel line R&D, designing, manufacturing, sales and services.

The potting machine is used for automatic glue potting of PV junction boxes. Discover more; Vertical Sorting Machine A vertical sorting machine is an automatic module sorter for sorting ...

We started to develop solar panel recycling technology in 2013, to solve this problem. Recycling glass, weight of which takes around 70 to 80 percent of a panel, is impossible if there are ...

Robot String Layup A robot string layup adopts leading machine vision technology and intelligent algorithms to rapidly and accurately identify the solar panel's size and other information. ...

Sorting and packaging machines are used in PV module manufacturing line for solar panel sorting and packaging. Horad provides three types of products in this regard, including auto labelling machine, corner protector inserting machine ...

Auto Trimming Machine The trimming machine can adapt to different sizes and shapes of panels and has a series of merits like high trimming quality, precision and speed, low noise and easy ...

Supo(Xiamen)Intelligent Equipment Co.,Ltd Engaged in Turnkey solution for solar panel production line and raw material supply chain management Address: G, Room 417, 66 Haijing ...

The loading machine adopts multiple innovative technologies to ensure the operation stability and continuity. Discover more; Vertical Sorting Machine A vertical sorting machine is an automatic module sorter for sorting

Photovoltaic panel sorting machine

and ...

An automatic corner protector inserting machine is used for automatic inserting of kraft or corrugated cardboard corner protectors for solar panels. The panel switching process is easy ...

Auto Trimming Machine An automatic trimming machine is used to automatically remove burrs and exceed materials from PV module edges after lamination. [Discover more](#); [Auto Corner ...](#)

Vertical Sorting Machine A vertical sorting machine is an automatic module sorter for sorting and sequencing of PV modules. The sorting machine supports flat and vertical sorting according to customer needs or panel powers. [Discover more](#); ...

An automatic corner grinding machines is an efficient machine used for automatic grinding of solar panel frame corners. The grinding machine is composed of conveying, positioning and corner ...

Our automated Solar/PV modules production line includes a complete set of equipment, such as solar cells laser cutting, string soldering, welding, glass loading, layup, laminating, framing, J-Box soldering, curing, final testing, ...

ConfirmWare solution covers machine design, lay out design, installing, and commissioning of your plant of solar panel on the turn-key basis. Whatever we do, it is your needs that guide us. We will start designing and customizing only ...

Robot String Layup A robot string layup adopts leading machine vision technology and intelligent algorithms to rapidly and accurately identify the solar panel's size and other information. [Discover more](#); [Auto String Taping Machine](#) The string ...

Robot String Layup A robot string layup adopts leading machine vision technology and intelligent algorithms to rapidly and accurately identify the solar panel's size and other information. [Discover more](#); [EVA Cutting & Layup](#) An EVA cutting & ...

We enable solar panel manufacturers and laboratories to accurately measure the performance of all types and sizes of PV modules up to 2.6m x 1.4m. The services that are offered to test the quality of the modules are the following:

Auto J-Box Potting Machine An automatic J-box potting machine is composed of conveying, positioning and potting systems. The potting machine is used for automatic glue potting of PV ...
